▶ ABOUT ARTITEQ

Based in Tilburg (NL), Artiteq is a specialist in hanging concepts, and has been developing flexible hanging systems for pictures and other wall decorations since 1995. Since decorating walls involves more than just hanging pictures, Artiteq combines this philosophy with its product specialism and has developed an extensive range of products in recent years. In addition to the picture hanging systems, Artiteq also markets display systems, solo hanging systems and sign hanging systems. Thanks in part to in-house expertise, and combined with its own product development and quality control departments, Artiteq also offers successful customised solutions for a variety of hanging needs. Flexibility and a continuous drive to keep innovating are Artiteq's strengths. In designing and producing our hanging systems, we aim to offer the best quality, whilst always placing a high priority on the environment and sustainability. Artiteq hanging systems are sold worldwide in over 60 countries.

Meet our company

WWW.ARTITEQ.COM

Artiteq has its own Research & Development department and generally develops all products with a Safety Factor of 3. In terms of products with higher safety risks (f.e. products which hang in open spaces not against walls) or when specific materials are used, this safety factor can even be 5 or higher. The Quality Control department checks safety in relation to the weight that can be hung from the products, but also checks the appearance and functionality of the products. In terms of the Micro Grip hook, Artiteq applies the quality assurance of TÜV, a certification that is extended to more Artiteq products. Based on the foregoing, Artiteq provides a 10-year* guarantee on all of its products (with the exception of Combi Rail Pro Light: a 2-year guarantee applies to electrical components).

PRODUCT WARRANTY

▶ SAFETY

Artiteq has its own Research & Development department and generally develops all products with a Safety Factor of 3. In terms of products with higher safety risks (f.e. products which hang in open spaces not against walls) or when specific materials are used, this safety factor can even be 5 or higher.

example of Micro Grip test results

▶ QUALITY CONTROL

Artiteq has its own Quality Control department. Not only does this department check safety in relation to the weight that can be hung from the products, but also checks the appearance and functionality of the products.

▶ TÜV

Artiteq delivers high quality products. To ensure and guarantee the quality of our products, Artiteq applies the quality assurance of TÜV on all its products. In addition, all our hanging rails, hanging wires and hooks are TÜV certified.

▶ GUARANTEE

Based on the foregoing, Artiteq provides a 10-year* guarantee on all of its products. *with the exception of Combi Rail Pro Light and Display It LED (a 2-year guarantee applies to electrical components).

In terms of the Combi Rail Pro Light picture hanging system (a product with electrical components), Artiteq declares that this product fulfils the applicable guidelines in accordance with standards EN 60598-1 / EN 60598-2-1 / EN 60570 / EN 55015 and EN 61547. No CE standardisation exists for all other Artiteq products. The Artiteq integrated picture hanging systems do not form part of a building's construction. It is important to emphasise that the systems are not intended to carry the construction of ceilings. The profiles are designed solely for hanging products (i.e. wall decorations, such as paintings, photo frames, etc.). The profiles may not be used for (are not designed for) absorbing additional forces.

The Click Rail is a flexible picture hanging system that you mount to the wall. Using the Click&Connect system, mounting the rail system is fast and easy. The Click Rail may be installed flush against the ceiling and may also be repainted, for example in the same colour as the wall or ceiling. This helps the picture hanging system 'blend in' with the wall or ceiling, making it nearly invisible. The hanging rail's appearance makes it easy to integrate in any room or interior. You always have flexibility in hanging posters, pictures or photo frames thanks to the hanging wires with hooks that you can click into any desired location on the rail system.

The Click Rail Pro hanging system is the professional, heavy-duty version of the Click Rail. The rail is quick and easy to instal thanks to the Click&Connect clips, and can be mounted on the wall, flush against the ceiling. It is possible to mount the rail in such a way that the sliders for the hanging wire may be subtly hidden behind the rail. The Click Rail Pro picture hanging system has a maximum load capacity of 50 kg/m. Hanging heavy pictures and wall decorations is no problem with the Click Rail Pro. Click Rail Pro is a strong picture hanging system that you can trust when it comes to hanging your art on the wall. The hanging wires may be moved and clicked into the rail again at any desired location. This assures you of flexibility in what you display on your walls. Moving or replacing a work of art is fast and easy, and there's no risk of damaging the walls.

CONTOUR RAIL

Compact and attractive hanging system

“Less rail, more art”. Contour Rail gets the job done in spite of its minimal dimensions, and has an attractive, sleek design. Hanging pictures, or hanging and moving framed photos is easy thanks to the Contour Rail. Using the clips, the picture rails may be mounted to the wall (minimum distance from the ceiling: 15 mm). In addition to the aluminium version of the rail, the available model in white may be painted in any colour. The refined style of the 1 mm Twister hanging wires with Micro Grip 1 mm suspension hook make them a perfect match for the compact shape of this hanging system.

CONTOUR RAIL GLUED

Contour Rail glued - hanging without drilling

Looking for a compact hanging rail that ‘disappears’ in a room? Contour Rail offers the solution: the rail can also be mounted to the ceiling using glue. Thanks to the special design, the glue may be applied in and on the profile in the desired manner. When the Contour Rail is glued and painted in the same colour as the wall, it becomes inconspicuous while still offering all the advantages of a flexible hanging system: the ability to hang and move pictures without damaging the walls.

Flexible picture hanging and lighting system in one

Combi Rail Pro Light combines picture hanging and lighting in one system. The rail's attractive, neutral design enables it to be integrated in almost every style of interior. Use the adjustable fittings to provide optimum and high-quality lighting for pictures and other wall decorations on your wall. You can position the Twister suspension wires anywhere along the rail, making it easy to change and move artwork and pictures. This flexible and user-friendly picture hanging system guarantees that the walls in your room will stay undamaged.

Easy installation in three steps

In 3 quick steps you can fit the rail and connect the power supply without requiring special tools and techniques. Step 1 comprises fitting the clips (Click&Connect) to the wall and clicking the rail to the clips. The rail immediately fits firmly in place after which you can carry out Step 2; connecting the power supply. Step 3 involves installing the picture lighting fittings: with just one quarter turn you can position these where you want on the rail. The fittings are suitable for LED lamps, available in lengths of 20 cm, 50 cm and 70 cm. You can adjust the high-temperature resistant luminaire cover, manufactured from high-quality plastic, to direct the lighting onto your picture. The conductive and hanging functions for the hanging rail with picture lighting are separated. All Combi Rail Pro Light components are approved by reputable, independent certification authorities.

Change pictures quickly and easily with Classic Rail

The Classic Rail is a wall rail that is often used in galleries and at exhibitions. This hanging system has an open J-shape which, with the aid of rods and sliding springs, makes it easy to hang pictures and other wall decorations. If you are looking for a discreet alternative to a rod, it is possible to use a cylinder hook with a transparent perlon cord in the rail. Depending on the weight of the picture or wall decoration, various hooks may be slid onto the perlon hanging wire.

A hanging rail for a contemporary interior

The Classic Rail is a J-shaped, open rail system with a modern look. This picture hanging system is available in white or aluminium. The rods that may be placed in the rail vary in thickness from 2 to 3 mm, and have a maximum load capacity of 20 kg. Available in white or steel, the rods use various sliding springs.

CLASSIC RAIL+

The Classic Rail+ is a picture hanging system for walls that has been specially developed for hanging heavier pictures and wall decorations (up to 40 kg). This hanging system is often used in galleries, at exhibitions and in museums. The hanging rail has an open, J-shaped design that makes it possible to hang a variety of rods equipped with rod hooks. This makes it extremely easy to hang or change art on the wall. The Classic Rail+ is available in white and aluminium. A variety of aluminium or steel rods may be used for decorations weighing up to a maximum of 40 kg.

Secure picture hanging system

The Classic Rail+ makes it possible to hang pictures and wall decorations in a secure manner in rooms where this is required. Thanks to a blocking device, the rod is blocked in the rail and the picture enjoys extra protection when special anti-theft hooks are used on the rod itself.

► PICTURE HANGING SYSTEMS

UP RAIL

20

KG/M

10

YEAR WARRANTY

3 CLIPS / M

The Up Rail is the leading ceiling rail par excellence; the rail is especially suitable when used in combination with concrete. The picture hanging system is clicked into place using clips (3 clips each metre) which are attached to the ceiling. The beautiful rounded shape of the rail fills the space between the wall and ceiling, therefore the picture hanging system is discrete and unobtrusive. The maximum bearing capacity of 20 kg/m makes the Up Rail a solid and reliable hanging system. The rail has a white, primed finish: the hanging rail can be painted in any preferred colour (for example, in the colour of the wall or ceiling). The Twister hanging wires can be clicked anywhere along the rail. If a ceiling mounting is required, for example if the walls may not be damaged or because it is not possible to attach a rail to the walls, the Up Rail is the ideal solution for flexible adornment of the walls.

TOP RAIL

20

KG/M

10

YEAR WARRANTY

8 SCREWS / M

The flexible picture hanging system Top Rail is mounted to the ceiling. This ceiling rail that is discreet in its dimensions is an ideal hanging system to use in combination with recessed ceilings. By mounting the ceiling rail to the wooden side strip of a recessed ceiling, the rail 'disappears' into the ceiling. This 'invisible' picture hanging system then offers a flexible way to hang, change and replace pictures and wall decorations throughout the entire room.

DECO RAIL

Flexible options for smooth walls with Deco Rail

The Deco Rail is a hanging rail for pictures and wall decorations that is mounted behind a cornice. The hanging system becomes invisible as a result, while still offering all the advantages of a flexible hanging system. Walls with a clean, smooth finish remain undamaged, even though it is still possible to hang and move paintings continually. Hanging wires may be clicked into the rail behind the cornice at any desired location. This is the major benefit of the Deco Rail; flexibility and a guarantee for a high-quality finish. There are many different styles of cornice rails, and this hanging rail can be installed behind every type. The Deco Rail is available in combination with a selection of three different types of cornices: Basic, Modern and Classic.

DECO RAIL LED

Invisible hanging system with subtle indirect lighting

The Deco Rail LED is a hanging system and lighting profile, with subtle indirect LED lighting in one. With the lighting profile C362 by ORAC, you add indirect lighting by diffusing light from the wall. A modern, ambient finish within the interior. Combining the Deco Rail with the lighting profile results in an invisible hanging system and allows flexible adornment of the walls. With no damage to sleekly finished walls, pictures can be hung and moved around whenever you please. Hanging wires can be clicked anywhere along the rail behind the lighting profile. The indirect lighting profile is supplied without the LED.

Hanging rail integrated in side strip - suitable for recessed ceilings using a side strip

The Art Strip is the picture hanging system that may be hidden in a recessed ceiling. It replaces the side strip which is used for the installation of recessed ceilings. During a tear-down phase or renovation work, the Art Strip can be installed at the same time as the recessed ceiling. The corner profile for the recessed ceiling is then mounted to the Art Strip. When you mount the Art Strip during the installation of recessed ceilings, you will have a picture hanging system available throughout the entire space, giving you a flexible way to decorate the walls. The Twister hanging cords may be clicked into any desired location in the rail next to the recessed ceiling.

Hanging rail for plasterboard ceilings and walls (drywall)

The Shadowline rail - drywall enables the placement of an invisible picture hanging system between plasterboard walls and ceiling panels. A discreet shadow line is the only element that appears between the wall and ceiling, and this is where the flexible picture hanging system is hidden. It is possible to install a hanging cord in the rail, anywhere you like in the room. Since the rail itself isn't visible, the hanging cords are suspended directly from the ceiling. If you choose the transparent perlon hanging cords for the rail, you will have the most discreet picture hanging system at your disposal. Using the Shadowline ceiling system means you will always have a guarantee of smooth, clean walls, and the flexibility to decorate them any way you like, without the need for tools.

Hanging rail for plasterboard ceilings and masonry walls

The Shadowline rail - masonry offers the same advantages as the plasterboard version, yet has been specially designed for use with masonry walls. The Shadowline rail is installed on a masonry wall during the building or renovation phase. The Shadowline profile disappears completely in the shadow line next to the ceiling panels, yet still offers all the advantages of a flexible hanging system: undamaged, clean walls and the flexibility to quickly and easily hang paintings and other wall decorations and move them around as desired.

BOTANIQ

Make room for plants on the wall

There is always room for plants in your home or office. Create a surprising and dynamic effect with the Artiteq Botaniq hanging flowerpot. Hang your plants optimally with the stylish Botaniq with soft round shapes. The Botaniq comes with two 1mm perlon Twister hanging wires and two Micro Grip hooks, so you can easily hang it at the right height within Artiteq's hanging rail. The Botaniq hanging flowerpot can only be used in combination with a picture hanging rail. Choose your color and combine with several other hanging pots at different heights to give your interior an urban jungle and natural touch!

UNIQ HANGER

A different way to hang wall decorations

In some spaces, it either isn't possible or desirable to use a hanging rail. The Uniq Hanger offers a solution for these situations. Not only is it easy and safe to hang a picture frame on the wall and easily adjust the height, but it also creates a certain look. The combination of the stainless steel button with the steel wire might result in just the look you want to create in an interior. You also have the option of fully concealing the system behind your photo frame or painting.

Hanging a frame without a rail

The Uniq Hanger consists of a wall fitting with cover, Twister 1 mm steel wire and a Micro Grip 1 mm suspension hook. It's easy to insert the steel wire in the wall fitting, and then just slide the stainless steel cover over this. After you slide the Micro Grip 1 mm over the steel wire, you can adjust the height. The Uniq Hanger may also be used with perlon hanging wires.

Flexible and solid

Since it is not always possible (or allowed) to hang rails in every room, we also offer solutions for hanging pictures and wall decorations in the form of partition wall hooks. We offer a range of various types of partition wall hooks for rooms with partitions, giving you a solid, practical way to hang pictures and decorations even on these types of walls. Partition wall hooks are hung over the top of a wall, and then used in combination with a perlon or other type of cord fitted with a picture hook. We offer a variety of solutions depending on the weight of the picture or decoration to be hung.

For hanging on to partition walls

For areas where partitions are used to create quick and durable ruites within (office) buildings, we have added two partition wall hooks to the range on the Obimex/ Alcoa/ Sypla and Systemflex / Interselect partitions. The wall hook is simply clicked into the desired location in the system wall and then used in combination with an Artiteq Twister Perlon hanging wire of 1 mm or 2 mm with picture hook. The wall hook has a maximum carrying capacity of 5 kg.

► HANGING WIRES AND HOOKS

FLEXIBLE
SAFE
STRONG

HANGING WIRES

In addition to the different hanging systems that Artiteq offers, there are (small) essential parts that are needed to actually hang the painting or wall decoration you want on the chosen rail. For example, there are various types of hanging wires and hooks to choose from, depending on your chosen rail and the weight of your painting or wall decoration.

TWISTER™

MAX.
20 KG

1

SIMPLE-SAFE-STRONG

Artiteq developed the Twister glider system for all its hanging rails. Twister offers the most Logical and user-friendly way to hook the hanging wire into the rail: insert, twist, click and you're done. Since the Twister may be clicked anywhere on the rail, you can hang a picture anywhere you like on the wall. You have the option of using Twister in perlon, steel wire or rods for all the Artiteq hanging systems. The perlon and steel hanging wires with the Twister mechanism are available in 1 or 2 mm thicknesses, and in lengths ranging from 100 to 500 cm.

TWISTER™

Twister is a European Registered Community Design.

installation video

1 mm

2 mm

HANGING WIRES

TWISTER™ CLIQ2FIX_{perlon}

MAX.
20 KG

2

EXTRA EASE-OF-USE

Thanks to the development of the Twister Cliq2Fix perlon system, perlon cord now has an additional functionality when it comes to hanging pictures. The hanging wire equipped with the Twister Cliq2Fix system may be inserted in the rail, eliminating the risk of the perlon cord popping loose from the rail as a result of its recoiling effect. This makes it extra safe, and easy to slide into the rail. In other words, extra ease-of-use.

2 mm

installation video

SOLID SLIDER

MAX.
20 KG

SLIDER ECONOMY

not visible in the rail

MAX.
15 KG

3

SLIDE INTO SIDE

Artiteq developed the Solid Slider system which attaches the hanging wire with glider via the side of the rail. This system is available for 2 mm perlon and 2 mm steel wire. The hanging wire may be freely slid into the hanging rail, yet may not be removed from the rail as easily. Hanging wires with the Solid Slider mechanism are available in lengths of 100, 150, 200, 250, 300 en 500 cm. A slanted stop system is available for slanted walls. This system makes it possible to use a flexible picture hanging system even with slanted walls, for example in a staircase.

installation video

2 mm

2 mm

2 mm

HANGING WIRES

1 mm vs 2 mm hanging wires

Artiteq offers the Twister hanging wires in two different thicknesses; 1 mm and 2 mm. Both perlon and steel wire hanging wires are available in the two different thicknesses. The steel wire black hanging wires are only available in 1 mm.

The choice of choosing 1 mm hanging wires depends on one's own requirements. The smaller the diameter of the hanging wire, the less visible it is. Especially with the perlon hanging wires, the choice for 1 mm can be preferable. To hang a frame or wall decoration as invisible as possible.

The maximum weight carrying capacity of a picture hook is only valid when the frame is correctly applied to the hook. This illustration shows how to correctly charge the picture hook.

MICRO GRIP

Micro Grip represents the newest generation of hooks. A high-quality plastic reinforced with fibreglass was chosen for this hook, leading to a 70% reduction in the use of materials compared with previous generations of hooks. In addition to the ecological advantages, the hook is extremely lightweight as a result, and very easy to use. The **Micro Grip** technology has been developed and patented by Artiteq. To guarantee the quality of the **Micro Grip** hooks, Artiteq has developed quality assurance procedures together with TÜV Nederland. The execution is under supervision of TÜV Nederland.

COMBINATIONS

A picture hanging system comprises the following elements: **rail**, **hanging wire** and **hanging hook**. Artiteq guarantees the functionality of the products because it carefully coordinates the various elements of a picture hanging system. The quality can only be guaranteed when original (Artiteq) products are combined correctly. The guarantee is null and void if there are combinations other than with the correct Artiteq products. A frame or canvas will always hang more steadily if **2 hanging wires** are used.

The weight of the frame determines the choice of the hook and wire, in combination with the maximum weight carrying capacity of one metre of the rail.

TWISTER HOOK

TWISTER HOOK	
SIZE	35x4x15 mm
MAX. CAPACITY	MAX. 1 kg
ARTICLE NO.	9.4510

COMPATIBLE WITH ALL ARTITEQ PICTURE HANGING SYSTEMS

The Twister Hook completely replaces the hanging wire and hook. This plastic hook can provide an economical and practical solution for hanging light panels, artwork or, for example, a light string or garland for decoration, in combination with a picture hanging system. The maximum load capacity of the Twister Hook is 1 kg. The Twister Hook can be clicked into the rail at any position; turn in, click in and done.

ARTITEQ BACK FRAME HANGING SYSTEM

A **safe** and **solid** solution to hang printed panels.
Adds **depth** and **shadow** between panel and wall.
Adds **rigidity** to **flexible** panels made of aluminium (Dibond), forex or acrylic.

The Back Frame Hanging System is a mounting system especially for thin and flexible panels made of aluminium, forex or acrylic. It helps to stiffen the panel, while mounting is easy and safe. The leveling system provided by the Back Frame Corners is particularly convenient for the mounted panel allowing adjustment for the panel up to 6 mm. The panel will always be straight without drilling new holes.

The Back Frame Hanging System is available in 8 mm and 15 mm profiles, both in the versions alu mill finish and silver anodised.

ARTITEQ BACK FRAME HANGING SYSTEM

1. WALL PROTECTION INCORPORATED

Wall protection is incorporated in the Power Corners.

2. LESS TAPE, BETTER LOAD CAPACITY

Rigid fixing thanks to steel spring!

Power Corners enable equal weight distribution because of rigid fixing thanks to steel spring in square-cut profiles instead of mitre-cut profiles.

3. EASY HANGING: 3 OPTIONS

The Artiteq Back Frame Power Corners provide 3 easy ways of hanging a printed panel : Fixed (1), Secured (2) and Flexible (3).

4. NO EXTRA ACCESSORIES NEEDED

The printed panel is hung using the Power Corners, no extra accessories needed.

ARTITEQ BACK FRAME HANGING SYSTEM

The Back Frame Hanging System is available in 8 mm and 15 mm profiles, both in the versions alu mill finish and silver anodised.

* SET DOES NOT INCLUDE POWER CORNERS 8MM

ARTITEQ BACK FRAME HANGING SYSTEM

A

For the correct sizing and positioning of the Back Frame Hanging System, we recommend placing the profiles at 100 mm from each side of the printed panel. When glueing the profiles to the back of the printed panels, we recommend using 3M tape (article number 05.16050).

B

The 8-mm and 15-mm profiles for the Back Frame Hanging System can also be mitre-cut. The profiles will fit with a wide range of accessories available on the market.

C

We recommend using 3M tape (general advice 3M: 25 cm2/kg) for printed panels made of aluminium, hard-foam, forex, acryl and glass. The below table applies when Back Frame Hanging System profiles are applied at max. 100 mm from each of the sides of the printed panel (see A). The table applies for panels with a maximum total weight of 30 kg and a minimum size of 400 x 400 mm.

MATERIAL	THICKNESS	TAPE	FOR SURFACES
Dibond	3-6 mm	Single tape 12 mm	Up to 4 m²
Forex	3-5 mm	Single tape 12 mm	Up to 4 m²
Acryl	3-5 mm	Single tape 12 mm	Up to 4 m²
Glass	6 mm	Double tape 24 mm	Up to 2 m²

*RAIL INCLUDES FASTENER MATERIAL AND END CAPS

Make a statement with LED panels

This cable system, with LED lighting, enables documents, products and services to be displayed perfectly. It is ideal as a display system in display cabinets, where the information can stand out both day and night! The rail can be mounted to the wall or the ceiling. The adaptors can be twisted into and out of the rail in an instant, allowing flexible use of the system.

DISPLAY IT LED FIXED

An eye-catcher on the wall

The Display It LED Fixed cable system is mounted to the wall or ceiling and because of the LED panels, this creates a striking display. Like the Flex version, the Display It LED Fixed can be used in display cabinets or in other places in a building. The content of the panels can be changed in no time.

DISPLAY IT LED PANELS

The A3, A4, A2 and A1 LED panels can be used in landscape and portrait format. The 2x A4 and 3x A4 LED panels can only be used in portrait format. All LED panels are equipped with bright LED lighting. The steel cables run through an auto-grip mechanism through the LED panels, connecting these together. This gives a professional, streamlined display and allows the height of the panels to be quickly and easily adjusted. This system allows double-sided displays: translucent paper can be inserted into the front and back of the LED panels.

DISPLAY IT FIXED

Display It: professional and orderly

The Display It presentation system gives you a professional and orderly way to display your announcements or documents. The system's acrylic frames are easy to mount and adjust to the desired height. Thanks to the E-Clip for Display It, you can change the contents of the acrylic frames in seconds. The clip also makes it easy to connect the frames to one another, making both horizontal and vertical displays possible. This display system is ideal for estate agents and is often used as a 'face wall' for photos of staff displayed on the wall in hospitals and other institutions. Display It is available in Flex and Fixed mounting models. The Display It Flex version is used in combination with a hanging rail and stainless steel rods that are easy to reposition along the rail.

HANGING WHITEBOARDS

There are a variety of ways to hang a whiteboard on the wall. Hanging a whiteboard with the aid of the Whiteboardset offers the option of repositioning the whiteboard either horizontally or vertically. The Artiteq Whiteboardset has been designed to make it easy to hang a whiteboard on the wall, and offers flexibility since it may be used in combination with our hanging rails. The clamps ensure a stable mounting of the whiteboard to the wall. By combining the Whiteboardset with the hanging rail, it is extremely easy to mount the whiteboard to the precise desired spot.

The Info Rail is the ideal display system for displaying cards, posters, drawings and photos on the wall. Thanks to the Info Rail, you can create a tidy, orderly display of your documents. This system means no more damaged walls from thumbtacks, tape and so on, and changing drawings or posters is fast and easy. This hanging system has become particularly indispensable in classrooms and school corridors. The Info Rail is also an ideal system for displaying or sharing information at home and the office.

Easy assembly thanks to clips

The Info Rail has been developed for hanging documents using a triple rubber clamping mechanism in the rail. Paper from 80 g to cardboard 2 mm thick can be firmly clamped into the rail. After mounting the Click & Connect clips to the wall, it's easy to attach the Info Rail to the clips. Available in different lengths, the Info Rail is easy to link to other Info Rails or shortened. Whether you want to display photos or drawings or keep recipes within easy reach, the Info Rail offers the solution.

Make the Info Rail versatile using the accessories *me*-clip, Clip Hanger, Support Clip and Storage Clip. See next page for more information.

me-clip – personal and organised

The *me-clip* adds an extra personal and beautifully designed element to the Info Rail system. A name can be added to the contents of the clip. A great solution for the perfect presentation and communication tool. The clip is always adaptable and always keeps its 100% quality appearance, no matter how often the clip is used. It's handy, and directly and rapidly adaptable thanks to Info Rail's smart, flexible properties.

Clip Hanger

With a simple click, the Clip Hanger is attached to the Info Rail, allowing a craft project to be hung up. In combination with the *me-clip*, art creations can be presented in a fun and personal manner.

STORAGE CLIP AND SUPPORT CLIP

Two useful additional accessories

The Support Clip and Storage Clip are two useful additional accessories for on the Info Rail and Info Rail Magnetic. Both accessories add an extra dimension and element to the Info Rail concept. With the Support Clip, you can easily present small crafts, greeting cards, small frames or paintings on canvas. The Support Clip is simply attached to the rail at any desired location. On the 6cm wide and 25cm long surface, changing small crafts, greeting cards or small frames is easy and quick. The subtle grooves ensure that the presented products remain securely in place. The Storage Clip is a practical additional storage compartment for pens, markers or other small items. Just like the Support Clip, the Storage Clip is simply attached to the rail at any desired location. The stylish round shape has a timeless appeal. Both accessories are available in black and white.

STORAGE CLIP

Practical use of narrow wall spaces

This vertical display system takes up little space and can therefore be used in many places in an office or home. The Card Rail is a hanging system for, for example, cards and photos and this is a useful system for collecting or displaying these. The cards and photos can be slid into both sides of the rail. The Card Rail also has a magnetic strip, which can also be used to display photos, cards, etc. The Mouse Magnets can be used on the front of the Card Rail. This display system can be a practical addition to the wall in especially an office, kitchen or child's bedroom.

The Card Rail has a sleek, white finish, RAL 9016 (can be repainted) and is 114 cm in length. Ideal for use in narrow wall spaces in different areas of the home or office.

Stylish presentation of pictures. ideas and information

A speedy solution for improved, more stylish presentation of pictures, ideas and information. From charts and models to photos of employees. The Smart Pocket Rail can be used for a very wide range of applications and is suitable for internal and external use. It is an ideal system for presenting content in a vivid way. It also transforms a boring wall into a dynamic part of the room. The Smart Pocket Rail is mounted to the wall with clips. You can easily click the acrylic pockets into this rail. You can choose from an A4 or A3 size. Because of the notch at the back and side of the pocket, you can change the content very quickly and easily, without having to remove the smart pockets from the rail.

SIGN HANGING SYSTEMS

SIGN HANGING SYSTEMS

Artiteq has selected the Fischer UX 5x30 R plug to be used in combination with its hanging systems. The Fischer UX 5x30 R plug can be used in different kinds of materials, such as concrete, stone and plasterboard. Depending on the material, the plug can support a maximum load of 30 kg. The drill used with the plug must have a diameter of 5 mm. The plug is 30 mm in length. The screw used with the plug is 38 mm long and has a diameter of 3,5 mm (to be used in combination with a PZ2 bit).

To determine the maximum load of a signing hanging system, it must be known what type of mounting materials will be used and what surface (i.e. type of material) these will be attached to. The components of the signing hanging system all have a maximum bearing capacity. This is the maximum bearing capacity for the component itself and not the maximum bearing capacity that must be taken into account for the system as a whole. For the whole system, the load capacity that is recommended for the mounting material in combination with the respective base material, takes precedence.

For every signing hanging system, the weight that you wish to hang must be balanced against the maximum load capacity of the mounting material. If systems are hung from other hanging components, such as recessed ceilings, you have to know the maximum load of this hanging component before fitting our systems. The tables below show the maximum load capacity for the Fischer plug in combination with different materials and the maximum bearing capacity for each component for the different signing hanging systems.

TYPE		UX 5X 30	
RECOMMENDED LOADS IN THE RESPECTIVE BASE MATERIAL F _{REC} ²⁾			
Concrete	≥ C20/25	[kN]	0,30
